- Available in 2100mm or 2500mm (long) versions.
- Long-anticipated lifespan.
- Low maintenance – wipe clean finish.

FingerKeeper Industrial - RP62 shown on a closed door

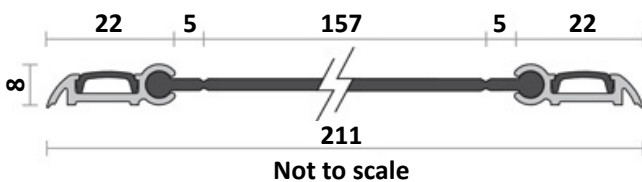

Product Description

Finger Keeper is a heavy-duty finger-pinch protection device (anti-finger-trapping hinge guard).

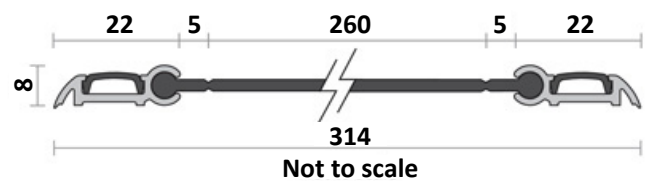

Manufactured from Black EPDM fitted in a Satin Anodised Aluminium carrier, that has black inserts to conceal the fixing screws. The EPDM safety strip prevents fingers being pinched on the hinge side of a gate / door. It is fixed to the gate / door and the jamb on the hinged side.

The Finger Keeper anti-finger trapping guard is suitable for the most demanding industrial environments.
