

ONE SIZE DOESN'T FIT ALL
And we've filled the gap

XM series

65mil

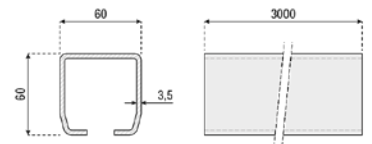

Introducing the XM series

Under our HI-MOTIONS offering we have an extensive range of galvanised cantilever rollers and runners. Available in various sizes, depending on the dimensions and characteristics of the gate or application, the all-new **XM** addition falls perfectly between the medium (M) and large (L) size, bridging the gap between these two sizes with its unique **68 mil profile**, making it ideal for the domestic market.

M SERIES

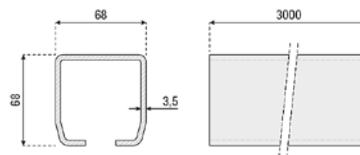

Recommended for gate openings of up to ...m and up to a weight of ... kg.

M

XM SERIES

Recommended for gate openings of up to ...m and up to a weight of ... kg.

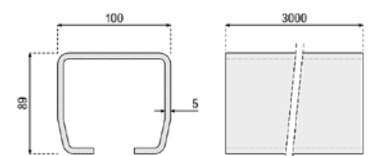

This is where the XM series comes into its own, with no equivalent currently on the market, this unique size is ideally suited for residential use, providing the perfect fit for gates with a profile of 65mil

XM

L SERIES

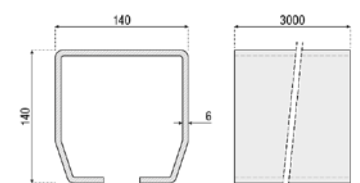

Recommended for gate openings of up to ...m and up to a weight of ... kg.

L

XL SERIES

Recommended for gate openings of up to ...m and up to a weight of ... kg.

XL
