

ELEVATING ACCESS CONTROL AT WATERSTAETE OSSENZIJL WITH THE DIVA.3 HIGH-SPEED BRUSHLESS BARRIER

Introduction

Situated on the fringes of the Weerribben-Wieden National Park in the Netherlands, Waterstaete Ossenzijl offers a unique and serene holiday destination amongst the captivating landscapes of the largest bog in Northwest Europe. Seeking an effective access control solution to manage vehicle flow and enhance security for guests, the holiday park opted to install the cutting-edge Benincà DIVA.3 brushless barrier at its main entrance point. The entire installation process, was seamlessly executed by Portacon, ensuring a hassle-free experience for Waterstaete Ossenzijl.

Benefits of installing the DIVA.3 Brushless Barrier:

1. Brushless Technology:

The incorporation of brushless technology sets the DIVA apart, guaranteeing intensive use, unrivalled performance, reliability, and fluidity in movement. This ensures a prolonged lifespan and consistent, smooth operation even under heavy usage scenarios.

2. High-Speed Operation:

With an impressive opening speed of 0.9 seconds (excluding slowdowns), the DIVA.3 brushless barrier ensures swift and efficient access control. This makes it an ideal solution for locations requiring intensive use, such as Waterstaete Ossenzijl, where a seamless and quick entry process is crucial for guest satisfaction.

3. Patented Light System:

The DIVA brushless traffic barrier is designed with an illumination and light diffusion system to ensure maximum visibility in all directions. The RGB LED lights enhance visibility and work as a traffic light. There is also the option to work as a flashing light using the DIVA.TL accessory.

4. Enhanced Security and Control:

For holiday parks like Waterstaete Ossenzijl, the DIVA brushless barrier proves to be an ideal solution for increasing security and controlling access at entrance and exit points. The barrier's advanced features provide a robust deterrent against unauthorised access.

Conclusion:

The installation of the DIVA.3 brushless barrier by Portacon, has proven to be a transformative solution for Waterstaete Ossenzijl. This innovative access control system not only enhances security but also contributes to the overall guest experience by combining a sleek design with state-of-the-art technology. The DIVA brushless barrier is the ideal choice for holiday parks seeking a reliable, efficient, and aesthetically pleasing solution for managing vehicle flow and access control.
